I am a Senior Business Technologist and Project Director based in Orlando, Florida. I am a business professional dealing with issues and solutions to problems in the areas of Information Lifecycle Data Management, electronic business transaction flow and business intelligence data storage & retrieval. I provide a complete skill set coupled with a professional business sense that provides me with the ability to understand complex business situations and 'pare' them down to achievable action steps. I have the ability to bounce from technical discussions with engineers to business analytical reviews with senior management. My drive, enthusiasm and team work skills allow me to define, develop and implement business process solutions to complex business problems.

As an experienced computer systems professional functioning as an information and data architect, I have gained valuable skills and knowledge by working in a wide range of industries and applying a varied set of technology solutions to complete project tasks and resolve client problems. My employment and consulting history includes such businesses as Manufacturing/Distribution, Pharmaceuticals, Oil & Gas, Petrochemical, Telecommunications, Public Accounting, Banking and Finance, Resort and Hotel Management, and Retail Sales and Distribution. Within these organizations, I have performed in positions as Programmer Analyst, Project Manager, Operations Director, Director of Development, Chief Information Officer and Chief Operating Officer.

I have developed project management and team building skills while utilizing precedence and critical path method management techniques. My experience with various computational frameworks, including Client Server, Distributed Data Warehousing, and Centralized Mainframe, provide a basis and experience to address significant business enterprise issues and provide solutions. I have worked with Electronic Business Flow Management (EBFM) systems utilizing EDI and Web Commerce and other electronic transaction tools to implement business-to-business communications solutions in conjunction with International/Global ERP systems deployments.

I have enjoyed an in depth involvement with a varied set of technologies and utilized them to provide productive and cost effective business solutions. As a Project Manager, I have worked around the globe reaching from the Prudhoe Bay Alaska to Hong Kong to Europe and Mexico. Working on massive projects like the Prudhoe Bay Sealift Project in Alaska to major manufacturing/distribution operations involving airfreight operations from Hong Kong to the USA, and warehouse management systems in Europe, I have developed team management and implementation skills enabling these and other projects to be completed on time and within budget. I am well versed in financial systems and operations working several years in commercial banking industry and public accounting. I have implemented Enterprise Resource Planning systems for manufacturing/distribution, electronics and pharmaceutical companies. I have also designed and implemented various manufacturing/distribution/financial electronic transaction systems for major manufacturers in the USA, Europe and China.

Additional Consultant Information

Professional Services

I specialize in Computer Resource Management (CRMR), Business Analysis Management (BAMR), Enterprise Application Integration (EAI) and Electronic Business Flow Management (EBFM) systems that involve many different aspects of computer technology, including Project Management, Change Management, Conversion/Migration, ERP implementation and Strategic Planning. My specialization over the past several years has been as an information and data architect, working with EBFM - Electronic Business Flow Management, EDI and other forms of electronic business-to-business communication, especially in the, manufacturing, distribution, retail, financial industries and health care (HIPAA).

I also focus on ERP/CRM systems with an emphasis on Order to Cash, Order to Pay and the deployment of the EDI interface transactions and third party systems interfaces. Conversion, migration and integration to third party systems (shipping, transportation, etc.) are functional areas where I excel. As an experienced Data Architect, I have designed interfaces and conversion requirements for several company implementations. As a Certified Information Systems Auditor (CISA) I have implemented the Oracle Enterprise One financial systems and automated payments and receipts processing modules saving significant labor and cash flow expenses. I also function as an Internal Controls and Sarbanes-Oxley compliance consultant.

EDI Support Services from The EDIGUY!

With the penetration of EDI transaction processing filtering down to smaller and smaller organizations, I have initiated a 'remote support' service for EDI processing. With a focus on Oracle Enterprise One (JD Edwards 5 [World 9.1, XE and OneWorld] and other ERP/CRM systems and experience with the coordination and deployment of the application modules, interface transactions and third party systems, I have experience with most prevalent transaction sets, including ANSI X12, X12N, Tradacoms (UK), EDIFACT (EU), XML (various) and other variations. Our industry experience includes pharmaceutical, manufacturing, wholesale/retail, transportation, shipping & distribution, healthcare, electronics and other industries around the world.

I have an emphasis on Order to Cash, Procure to Pay and the deployment of the EDI interface transactions and third party systems interfaces. Total entry to exit strategies for transaction processing provide a complete analytical transaction validation process to insure that ALL business processes work in concordance with the electronic transaction processes.

Please visit my EDI support sites: <http://www.ediguy.net>, <http://www.erp-edi.net> and JD Edwards EDI site: <http://www.jde-edi.com>.

Regards,
Skip Stein
